

# Asset Intelligence™

An I.D. Systems™ Company

## VeriWise™ Tractor ID

Tractor ID helps maximize trailer fleet security and efficiency by capturing the tractor number and fleet code when a tractor connects to a VeriWise equipped trailer. The VeriWise device mounted in the trailer stores the tractor number/fleet code and sends it in the next report, or creates an alert, immediately transmitting the information, depending on user preference. The absence of a tractor ID, upon connection to a tractor, is also captured.

The remote visibility enabled by Tractor ID provides invaluable intelligence to the fleet manager. The dispatcher can ensure that the correct tractor picked up the correct trailer - eliminating the time, cost, and customer service impact of misdirected loads. Security procedures can be initiated if an unidentified tractor connects to a trailer. The information is provided either on the VeriWise Intelligence Platform (VIP) website, or via e-mail/text message to a user-defined recipient list.

## Time-Tested and Customer Proven

Asset Intelligence works with some of the world's largest transportation companies to develop and deliver proven fleet management tracking solutions. Our combined satellite and cellular-based solutions portfolio is unmatched in the industry, and we have demonstrated that fleet management works - and pays. Put Asset Intelligence to work for you today and reap the rewards of better fleet management.

---

### Features

- Immediate notification that a tractor has hooked to a trailer
- Transmits 4-digit fleet code and 6-digit tractor identifier while hooked
- Customizable fleet code selections for large customer subfleets

### Benefits

- Quickly identify and recover stolen loads
- Minimize time and cost of misdirected loads
- Readily identify available trailers
- Identify dedicated fleet trailer usage

VeriWise's robust web-based interface provides up-to-date information. The Tractor History Report displays historical data for each tractor and identifies the trailers it has hooked to over a specific time period.

## General Specifications

Hardware dimensions*	2.4"(L) x 2.2"(W) x 0.6"(D)
Operating temperature	40°C/-40°F to +85°C/185°F
Conforms to SAE-J1455 Standards	
Communicator via industry standard	
PLC4TRUCKS messaging (Power Line Communications)	

## About Asset Intelligence

Asset Intelligence is focused on delivering solutions to address the challenges of the global supply chain. By leveraging the latest wireless communications and web technologies, the VeriWise satellite and cellular-based platforms offer intelligent solutions that provide shippers and carriers with tools to better manage fleets, freight, and maintenance operations. Quick access to actionable intelligence empowers you to make more informed decisions about securing and optimizing your asset portfolios and streamlining your supply chains.
