VeriWise™ GPS Mileage improves fleet maintenance management

VeriWise GPS Mileage from Asset Intelligence is the only “virtual” odometer on the market for trailer fleet management. GPS Mileage is a VeriWise service that provides users the ability to track multiple mileage readings on trailers for improved fleet and maintenance management.

Whether you're managing a fleet of 10 or 10,000, running a tight, efficient operation is critical. GPS Mileage gives you the power to know exactly when maintenance is due so you can meet government regulations in a timely manner and do so cost effectively. Saving money is critical and using GPS Mileage can help you build your bottom line.

Multiple Uses

Depending on which service package you choose, GPS Mileage can give you up to 21 mileage counters. For example, if you need to know how long between brake inspections, simply designate a counter to the assigned brake and wait for the alert when you reach the assigned mileage. Or, if you are a leasing company, you can ensure that correct mileage is being charged to your customer.

Features

- “Virtual” odometer means no additional hardware expense, maintenance or installation.
- Multiple trip and maintenance counters reduce the complexity of tracking multiple, mileage-based activities.

The GPS Mileage service updates every minute when your asset is powered and moving. Using VeriWise's easy-to-use web interface, you set the parameters and then let the virtual mileage counter do the work for you.

- Set up counters at company and asset type level
- Set target, warning, and reminder levels for each counter
- Set up email distribution lists to receive warning messages and reports

There is no need for any additional equipment. It works with your current VeriWise satellite or cellular system that has 7-way power. This reliable system has been designed and tested using strict Six Sigma quality processes.

Time-Tested and Customer Proven

Asset Intelligence works with some of the world's largest transportation companies to develop and deliver proven fleet management tracking solutions. Our combined satellite and cellular-based solutions portfolio is unmatched in the industry, and we have demonstrated that fleet management works - and pays. Put Asset Intelligence to work for you today and reap the rewards of better fleet management.

- Configurable warning and reminder alerts save you time in reviewing data for exceptions that need attention. Alerts let you know when attention is needed.
- Mileage and program maintenance status reports quickly determine actions needed based on accumulated mileage - all without check calls or maintaining additional spreadsheets.
