

# Hosted Vehicle Management System

## PowerBox™—The Easiest Way to Implement and Maximize the Value of Core Vehicle Management

- Focused, pre-configured, out-of-the-box solution for the most essential vehicle management functions:
  - Vehicle access control
  - Electronic safety checklists
  - Impact management
  - Maintenance controls
  - Fleet utilization analysis
  - 100% wireless, automatic data flows
- Simple, hands-off, remotely hosted implementation:
  - Cellular, hosted system—no complications, no IT support needed, easy to install & maintain
  - Proven robustness & reliability (99.8% uptime)
  - Dashboard reports—emailed automatically—quantify benefits, not just data
- Low upfront cost & low monthly service fee
- Ideal for small to medium fleets, and any organization with basic VMS requirements

If you're like most organizations that rely on lift trucks to get your business done, chances are you'd like to manage your fleet better—reduce costs and damage, get more control over maintenance, and improve safety & utilization.

PowerBox™ makes it easy for you to get just what you want, with minimal effort & maximum value.

As a hosted solution, PowerBox™ means rapid, hassle-free deployment and insightful dashboard reports (automatically emailed) that show you not just how you're doing, but what more you can do!
