

Asset Intelligence™

An I.D. Systems™ Company

VeriWise™ Solutions for Domestic Containers

VeriWise is not just an asset location system - it is a fleet management system. Whether you're managing a fleet of 10 or 10,000, running a tight, efficient operation is critical. But with so many demands on your time, asset management can be a challenge.

The VeriWise solution for Domestic Containers leverages the experience gained operating in power-starved, harsh environmental conditions. The robust power system employs four solar panels, and power saving device firmware that ensures the operation of the SAT-D400 with just a few hours of sunlight a day.

To ensure years of maintenance free-performance, VeriWise for Domestic Containers has been tested to some of the toughest environmental standards, including SAE J1455, AAR-S5702, MIL-STD-810E, and ISO 20653.

Features

- Built-in, patented motion sensor (detects container beginning and end of drive, as well as loading/unloading activity)
- Built-in patented Full-Length Cargo Sensor
- True GPS location (allows for location-aware decisions)
- Operates independently of external power, utilizing solar panels to maintain the charge of a rugged, long-life battery
- Secure Installation
- J1455 compliant
- All in-one design allows for easy install
- Flexible design accommodates multiple container designs

The Smarter Fleet Management Solution

In order to effectively manage your fleet, knowing where your container was last night is not good enough. If it moved, most tracking systems do not notify you until up to 24 hours later. Our unique motion sensor detects movement and reports beginning of drive and end of drive. Our patented Full-Length Cargo Sensor tells you whether the container is loaded or empty, and our web-based software application pulls it all together - so you are empowered to make smarter decisions immediately.

Time-Tested and Customer Proven

Asset Intelligence works with some of the world's largest transportation companies to develop and deliver proven fleet management tracking solutions. Our combined satellite and cellular-based solutions portfolio is unmatched in the industry, and we have demonstrated that fleet management works - and pays. Put Asset Intelligence to work for you today and reap the rewards of better fleet management.

Web-Based Interface

- User-defined landmarks
- Satellite imagery and detailed maps
- "Ping" capability 24 X 7 X 365
- User-defined reporting
- Emergency track
- Start-of-drive and end-of-drive reports
- Time scheduled reports
- User defined alerts messages to email or phone
- Toll-free customer service

VeriWise™ SATELLITE Domestic Container SAT-D400

VeriWise SATELLITE Domestic Container SAT-D400

Features	Benefits
Simple Installation	Requires no connection to 7-way power
Two-Way Radio Satellite Capability	Capable of transmitting and receiving data/configuration information; ability to accept over-the-air (OTA) commands; ping/emergency track
Long Battery Life	Non-reliance on tractor power; charges through use of solar power; reduces cost of ownership; simpler installation; increases reliability
Intelligent Messaging	Unit reports on a time interval or based on exception events such as motion. Allows you to focus only on containers that need attention.
North American Coverage	Operates effectively in Canada, US, and Mexico; works wherever your container goes
Reliable	Proven design quality; reduces cost of ownership
Durable	Able to handle container environments and weather for 5-7 years; provides low maintenance
Scheduled Reports	Ability to report location up to twice per day on a scheduled basis; consistent tracking and location data for your fleet
Motion Report and Watchdog Messages	Only report exceptions to reduce message costs and extend battery life.

General Specifications

Hardware dimensions*	3.75" x 31" x 9.75"
Operating temperature	-40°C/-40°F to +85°C/185°F
Storage temperature	-40°C/-40°F to +85°C/185°F
Product Weight	15 pounds
Wireless network	Orbcomm Satellite
Environmental Tests	SAE J1455, AAR-S5702, MIL-STD-810E, and ISO 20653

* Mounting assembly may vary.

About Asset Intelligence

Asset Intelligence is focused on delivering solutions to address the challenges of the global supply chain. By leveraging the latest wireless communications and web technologies, the VeriWise satellite and cellular-based platforms offer intelligent solutions that provide shippers and carriers with tools to better manage fleets, freight, and maintenance operations. Quick access to actionable intelligence empowers you to make more informed decisions about securing and optimizing your asset portfolios and streamlining your supply chains.
